

## Tiberius Mag Modification Instructions for Killjoy Mag Release

The tools you will need:

- 1.) Vise (optional, but recommended)
- 2.) Hand file
- 3.) Black paint Pen or Marker

- 1.) Clamp the mag into the vise with the slot facing up. Clamp it just tight enough so the mag will not move.
- 2.) Use the thin edge of the hand file to get the slot started. Take your time, so you get a nice straight line.
- 3.) Once you get a groove started, it's simple, just file it down so it matches the other side.
- 4.) When you are finished filing, use the paint pen or marker to cover up the silver parts you just filed.

**This is what the finished mag should look like.**
